

Preventive Maintenance An investment for your peace of mind

You don't have to be surprised by the cost of repairs.

Following your car manufacturer's recommendations for preventive maintenance has numerous advantages. It will help you keep repairs to a minimum, both in extent and in cost, simply because replacing worn components before they fail prevents more extensive damage.

If you use your vehicle to pull a trailer or carry heavy loads, or if you drive in mountains or dusty environments, your professional technician can also suggest parts designed to suit your needs and your budget.

Investing in peace of mind... Can you afford not to?

Between maintenance visits, you can do your share of preventive maintenance:

Replace wiper blades when streaking occurs.

Make sure tires are properly inflated.

Top off motor oil, coolant and windshield washer.

Pay attention to leaks under your car and investigate.

Make sure you keep an emergency kit in the trunk that includes : pre-mix engine coolant, motor oil, a flashlight, road flares, boosting cables, a blanket and a first aid kit.

Maintenance Log (recommended maintenance)

Engine / Transmission	Engine Oil and Filter	Every 8,000 km** or 10,000 km*	p. 7, p. 13				
	Engine Air and Fuel Filter	Replaced every 50,000 km*	p. 7, p. 13				
	Ignition Wires, Cap & Rotor, Spark plugs	Replaced every 50,000 km*	p. 7, p. 13				
	Engine Coolant	Replaced every 50,000 km*	p. 7, p. 9, p. 13, p. 15				
	Fuel Injectors	Cleaned every 50,000 km*	p. 13				
	Transmission Fluid & Filter	Replaced every 50,000 km*	p. 7, p. 9				
	Engine Accessory & AC Drive belts/Water Pump	Replaced every 100,000 km*	p. 7, p. 9, p. 17				
	Timing Belts / Pulleys and Tensioners	Replaced every 100,000 km*	p. 17				
	Radiator Cap	Pressure tested every year*	p. 9				
	Battery/Alternator/ Starter	Checked once a year*	p. 15				
	Engine Gaskets	Inspected every year*	p. 17				

* Average only. Please consult your automotive technician or see your Owner's Manual to find out about the maintenance schedule specific to your vehicle.

Indicate your vehicle's mileage every time a recommended maintenance is performed

Brakes et Bearings	Brake Pads / Shoes Discs / Drums / Hoses	Inspected every 25,000 km*	p. 11				
	Wheel Bearings	Inspected and greased every 25,000 km*	p. 11				
	Hydraulic Brake Fluid	Replaced every 50,000 km*	p. 11				
Suspension / Steering	Tires and air pressure	Inspected every 5,000 km*	p. 3				
	Tire Rotation	Every 10,000 km*	p. 3				
	Shocks, struts, coil springs	Inspected every 20,000 km*	p. 3				
	Alignment	Yearly/repair/new tires installed*	p. 3				
	CV shafts, rack and pinion boots	Inspected twice a year*	p. 3				
Emission / Antipollution	Emission and Exhaust System	Inspected yearly*	p. 5				
	Oxygen Sensors	Every 100,000 km or 160,000 km*	p. 5, p. 13				
Miscellaneous	Cabin Air Filter	Replaced every 25,000 km*	p. 7, p. 13				
	Wiper Blades	Replaced every 25,000 km*	p. 7				

** Severe service: Turbo or Diesel engine, vehicles driven over short distances, intense Stop & Go driving or long idling periods.
